Save your lines.

The **EZ Claw hose and cable management system** keeps air lines, power cords and hydraulic hoses adequately supported above the catwalk on tractor-trailer combinations. **No more dragging lines from weakened and sagging springs.**

Distributor Contact Information:

EZ Claw Benefits

Prevent DOT Fines

Maintain compliance by keeping your lines adequately supported above the catwalk.

Reduce Downtime

Spend less time adjusting lines or waiting for roadside service calls due to hose failure.

Eliminate Replacement Costs

Cut the costs of new lines from dragging or new springs/bungees from stretching over time.

Maintenance Free

Coiled tensioner prevents stainless steel cable from overextending and stretching like standard springs.

Weather & Corrosion Resistant

Zinc plated/powder coated finish and stainless steel components will hold up for the lifetime of the truck.

Eliminate Noise

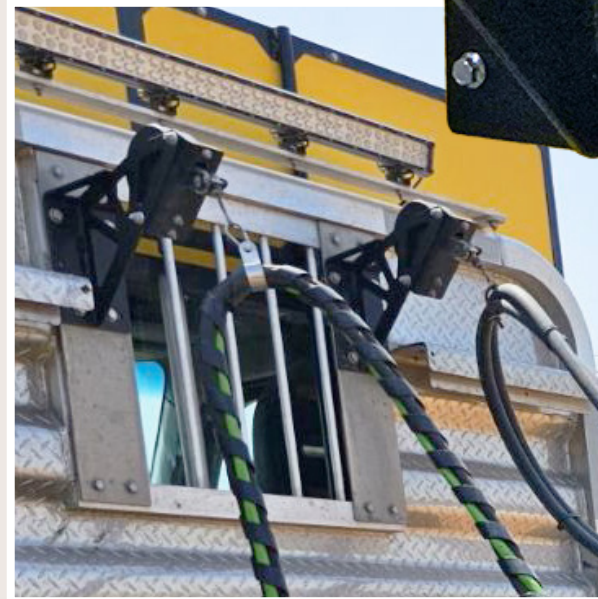

Sturdy brackets prevent lines from hitting the back of the cab while in motion.

Easy Installation

Quick one-time installation that takes less than an hour.

Safety

Improve operator safety overall by eliminating trip hazards on the catwalk.

Types of Truck Mounts

Cab Mount

The EZ Claw system offers several brackets and adapters to work with specific OEM mounting locations to adequately support the brake hoses and power cords on the back of your cab, and hydraulic lines on your headache rack.

Center Post Mount

6' bolt-on stand-alone bracket for trucks with longer wheelbases and wetkits. Capable of supporting 160 lbs. of air hoses, hydraulic lines, power cords, lights and alarms.

Direct Mount

Typical installation for yard hostlers. Direct mount to back of the cab without additional adapters and brackets.

Under Trailer Line Saver

For Under Trailer applications, EZ Claw offers the Under Deck California Hookup Line Saver and the Tandem Axle Slider Line Saver. The former bolts ahead of the landing gear and the latter is positioned ahead of the sliding tandems.
