

"It's something that changes everything. Not only the **convenience of keeping your airlines off your catwalk**, but from a safety point of view. I believe it should be mandatory on every truck – it keeps everything from being tangled up. It's better than what we have now. **Springs wear out after a while; EZ Claw doesn't.**"

– Steven Myers, Alabama  
Satisfied Customer

## Pair your EZ Claw Tensioner with these accessories:

### EZ Claw Sling

Item # EZC-S  
Patented sling supports 3-in-1 and 4-in-1 hoses, as well as hydraulic hoses up to 2" in diameter. The self-adjusting slipknot makes it easy to adjust on the fly.

### Hose & Cable Block

Item # EZC-HCH38  
Organizes lines and reduces cable movement when not wrapped together. Made from high-impact, engineering-grade polymer with stainless steel carabiner.

# Save your lines.

The patented **EZ Claw Line Saver System** keeps air lines, power cords and hydraulic hoses easily supported above the catwalk on tractor-trailer combinations.

# Why EZ Claw?

Prevent hose failure from sagging, dragging and chafing air lines and electrical cords with the strong and sturdy EZ Claw Line Saver system. Our patented Line Saver will keep everything supported and organized.

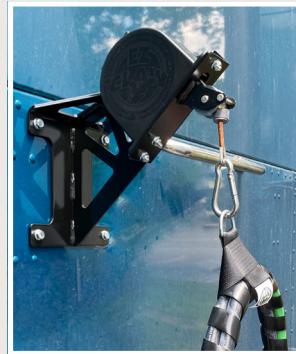

## EZ Claw Typical Kit Components\*

- 1 Weatherproof Line Saver Tensioner
- 2 Stainless steel retractable cable
- 3 EZ Claw Line Saver Sling
- 4 Mounting brackets and hardware

\*Actual parts vary by model.

# Mounting Types

## Cab Mount

Several brackets and adapters available for all makes and models of trucks that work with specific OEM mounting locations.

## Direct Mount

Typical installation for yard trucks. Attaches to the side of the cab without additional adapters or brackets.

## Center Post Mount

Bolt-on, stand-alone bracket for trucks with longer wheel bases and hydraulic wet kits. This 6' upright stand can support up to 160 lbs. of air hoses, hydraulic lines, power cords, lights and more.

## Under Trailer Line Saver

EZ Claw offers two Line Saver options for Under Trailer applications. The Under Deck California Hookup accommodates lines plumbed between the frame rails on semi tractors, while the Tandem Slider provides line support for sliding tandem axles.

# Benefits

## Prevent DOT Fines

Maintain compliance by keeping your lines supported above the catwalk.

## Minimize Downtime

Spend less time adjusting lines or waiting for roadside service calls due to hose failure.

## Eliminate Replacement Costs

Our system lasts the lifetime of your truck. No sagging springs or chafed lines to replace.

## Maintenance Free

Coiled tensioner prevents stainless steel cable from overextending and stretching like standard springs.

## Weather & Corrosion Resistant

Zinc plated/powder coated finish and stainless steel components will hold up to the elements. Salt test results available upon request.

## Reduce Noise

Sturdy brackets prevent lines from hitting the back of the cab while in motion.

## Solid Structure

Our system takes advantage of existing cab and frame structure for efficient and secure bracket installation.

## Safety

Improve operator safety overall by eliminating trip hazards on the catwalk.
